BIO

Gerda Jacobs was born in Maastricht, the Netherlands, and moved to France in1985. From a very early age, she started to "tinker" with different materials, fabrics, wood, stone,…. She is fascinated by the possibilities of these materials.

Years later, after an international career in marketing, she decided to devote herself to creation, the means to explore her inner self.

In 2008 and 2009, she trained as a mosaicist in Paris and deepened her contact with the material. The slowness and precision of the work correspond to the inner journey that Gerda needs. In 2009, she set up her first studio in the eighteenth arrondissement of Paris and in 2012, she finds in the southern Touraine the place that inspires her imagination. During this period, she invented her own technique, inspired by the engravers, using acid on zinc plates. She creates and develops her works to reveal through raw and ordinary materials the hidden beauty of all that surrounds us.

Gerda has exhibited in numerous shows throughout Europe, the Discovery Art Fair in Frankfurt and Cologne, the Salon international de l'art contemporain in Luxembourg, Brussels and Paris. Her works are in private collections in France, Germany and the Benelux countries.

In 2022, she received the Gold List Award from Art Market magazine (USA/Canada/Israel).
